8.2. Exposure controls

Appropriate engineering controls	: Ensure good ventilation of the work station.
Personal protective equipment	: Avoid all unnecessary exposure.
Hand protection	: Protective gloves. The glove material has to be impermeable and resistant to the product/the substance/the preparation. Use equipment tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU). Materials including natural rubber latex or nitrile with a material thickness of 4-6mm are suggested for general use, however the selection of suitable gloves does not only depend on the material, but also on other marks of quality. Quality may vary from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance and penetration time/breakthrough time of the glove material cannot be calculated/observed in advance and therefore has to be checked prior to the application.
Eye protection	: Safety glasses
Skin and body protection	: Wear suitable protective clothing
Respiratory protection	: In case of insufficient ventilation, wear suitable respiratory equipment
Environmental exposure controls	: Avoid release to the environment.
Other information	: Do not eat, drink or smoke during use.
