

## AEROSPRAY® Control Slides

Providing quality control to your laboratory

Innovation with Integrity

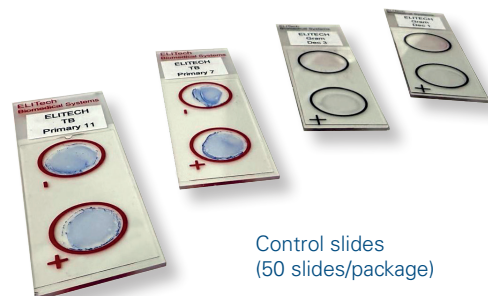

# Valuable tip for your quality management

Standardized control slides are very useful for establishing new methods in the laboratory. Furthermore, control slides are very useful for routine quality control (recommended for every run), protocol validation and assay optimization.

Can be used to verify quality control management techniques.

Support staff training and use of new reagents.

No need to stock cultures.

Control slides  
(50 slides/package)
